

AI Readiness Diagnostic

Most organisations are experimenting with AI. Few are building the capability to create *lasting value* from it.

An executive-level assessment of your organisation's readiness to deploy, scale, and sustain Artificial Intelligence — across seven capability dimensions inspired by the Gartner AI Maturity Framework.

21 QUESTIONS — 12-15 MINUTES — CONFIDENTIAL — NO OBLIGATION

01 — THE EXECUTIVE CHALLENGE

AI success depends far more on organisational capability than technology.

Many organisations have launched AI initiatives. Few have developed the strategy, governance, operating model, and organisational capabilities required to create sustainable business value — leaving AI projects as isolated experiments that never scale.

03 — WHAT YOU'LL RECEIVE

- | | |
|------------------------------------|---------------------------------|
| 01 Overall AI Readiness Score | 05 AI maturity assessment |
| 02 Results across seven dimensions | 06 Strategic AI priorities |
| 03 AI transformation strengths | 07 Personalised recommendations |
| 04 Capability gaps and risks | 08 45-minute Executive Review |

04 — DESIGNED FOR

- | | | | | |
|---------------------------|------|----------------------------|------|------------------------|
| CEOS | CIOS | CTOS | CFOS | CHIEF DIGITAL OFFICERS |
| AI TRANSFORMATION LEADERS | | EXECUTIVE LEADERSHIP TEAMS | | |
| PE PORTFOLIO COMPANIES | | | | |

KEY LINE

AI transformation is an organisational challenge — not simply a technology project.
