

Quick Business Diagnostic

Understand where your business *stands* — and what to do next.

An executive-level snapshot of your organisation's current health in 10–15 minutes. Structured across six core business dimensions, the assessment helps leaders identify strengths, uncover emerging risks, and prioritise the areas with the greatest impact on future performance.

18 QUESTIONS — 10–15 MINUTES — CONFIDENTIAL — NO OBLIGATION

01 — THE EXECUTIVE CHALLENGE

Business performance rarely changes overnight.

Declining profitability, slowing growth, operational inefficiencies, cash flow pressure, and execution challenges develop gradually — through small signals across finance, operations, commercial activities, technology, and leadership. Most organisations review these signals independently, so leadership teams often recognise problems only after they appear in financial results.

03 — WHAT YOU'LL RECEIVE

- | | |
|--------------------------------------|--|
| 01 Overall Business Health Score | 05 Key improvement opportunities |
| 02 Performance across six dimensions | 06 Executive-level maturity assessment |
