

THE VALUEFABRIC CATEGORY

The Operating Intelligence OS for portfolio value creation.

See value moving before EBITDA shows the problem.

ValueFabric connects operating data, decisions, execution and measurable Performance Outcomes across investors, portfolio companies and operating teams.

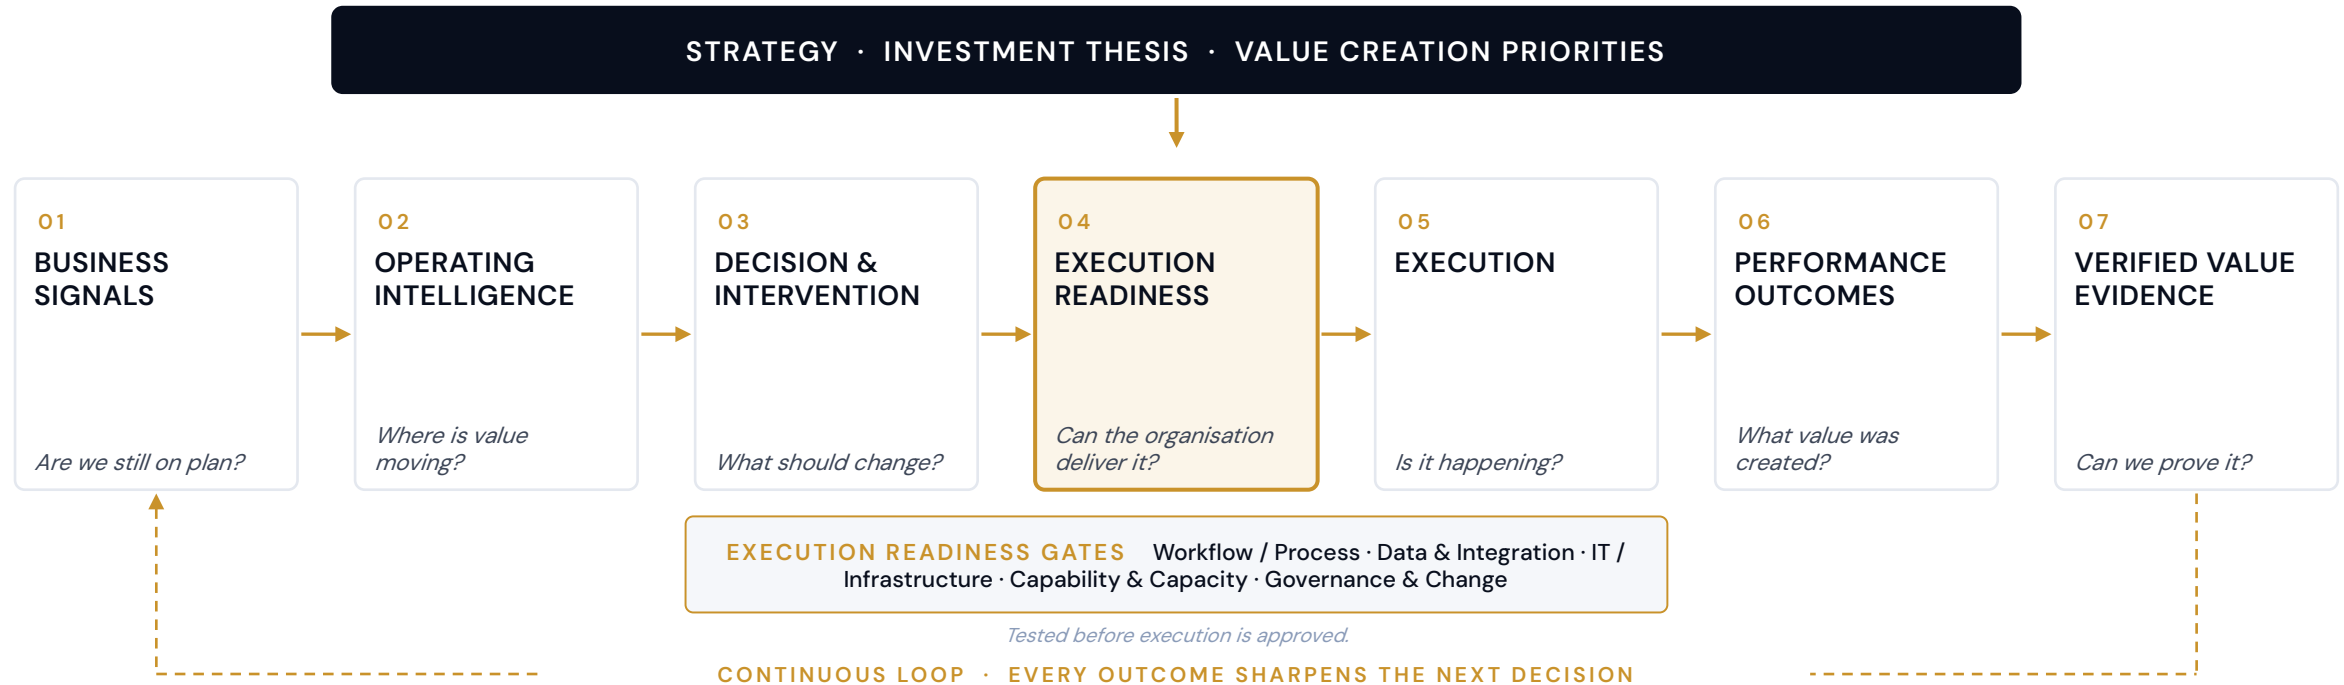

DETECT EARLIER · DECIDE BETTER · EXECUTE FOR REAL · PROVE WHAT CREATED VALUE

Not another dashboard. Not another point solution. One Operating Intelligence infrastructure.

BUILT FOR PRIVATE EQUITY · VENTURE CAPITAL · FAMILY OFFICES · CEOs / CFOs / COOs · OPERATING PARTNERS · M&A PARTNERS

FROM SIGNAL TO VERIFIED VALUE

Intelligence is only valuable when the organisation can execute it.

EBITDA · CASH · WORKING CAPITAL · MARGIN · REVENUE QUALITY · OPERATING PERFORMANCE · ENTERPRISE VALUE

A good recommendation is not enough. The organisation must be able to deliver it.

AI supports detection, interpretation, decision support and measurement. People approve. Management and operators execute.

ONE INFRASTRUCTURE · MULTIPLE PRODUCTS

One Operating Intelligence infrastructure

Start with one business problem. Activate additional products without rebuilding the foundation.

PORTFOLIO

Portfolio Operating Intelligence · M&A Value Creation Intelligence

Portfolio prioritisation · Investment thesis monitoring · Operating Partner allocation · Post-deal value creation

**PORTFOLIO COMPANIES**

Manufacturing · Business & Industrial Services · Distribution & Wholesale · Logistics & Transportation · Healthcare
13-Week Liquidity & Working Capital Control · Financial Control / Continuous FP&A

**EXECUTION**

Execution Readiness Intelligence · AI Execution Fabric · Verified Value Creation & Evidence

PERFORMANCE SIGNAL ENGINE Continuous monitoring of critical Business Signals across activated companies and products

Onboard once. Connect once. Activate multiple products.

Context → Signals → Decisions → Interventions → Execution → Outcomes → Evidence → Better Next Decision

Start with **one priority value-creation use case.**

ValueFabric methodology, diagnostics and selected products apply today; the broader continuous Operating Intelligence architecture is being progressively deployed and validated with Design Partners.
